

Tebamol®

THE PURE TEA TREE OIL

With pure Australian
TEA TREE OIL
in T.T.O. quality*

The essential oil for various applications

The Bundjalung Aborigines in the north of New South Wales had probably known about the special properties of the tea tree leaves for several millennia. These were used by the Aborigines as infusions and compresses - usually after soaking in water for a long time. But only James Cook, who had a tea made from the leaves, made this miracle tree famous beyond the borders of Australia in 1770. This is where the name „Tea Tree“ comes from. The essential oil was first distilled in 1925 and has developed over the years into a universal household remedy with a wide range of uses in Australia. Even today, it is still missing in hardly any Australian household! Of the more than 200 existing Melaleuca species worldwide - belonging to the myrtle family - only about 30 are native to Australia and only one - Melaleuca alternifolia of the terpinene-4-ol type - has the special properties. This species - growing in the hot and humid climate of Australia - is extremely hardy

and disease resistant and is not attacked by fungi even under such extreme climatic conditions. The essential oil is extracted from the leaves of this tree, which are harvested every 15 to 18 months and immediately grow back again, by steam distillation.

The accumulated knowledge about the active ingredients of this oil is reflected in the ISO/DIS standard 4730, which sets a minimum of 30% for terpinene-4-ol. The proportion of cineol in tea tree oil is specified here with a maximum of 15 %.

Cosmetic products containing genuine Australian tea tree oil, such as creams or shampoos, also have excellent properties.

Therefore, in addition to pure Australian tea tree oil, the following Tebamol® tea tree oil products are also available as cosmetics exclusively in pharmacies.

The pure Australian tea tree oil

* T.T.O.® quality means: Laboratory tested for purity, 100 % natural, around 4 % cineol content and at least 35 % terpinene-4-ol content.

antimicrobial

This T.T.O.® quality is guaranteed by HÜBNER Naturarzneimittel GmbH for the pure Australian tea tree oil as well as for all other tea tree oil products. The quality of our products is subject to constant control by our quality control laboratory. HÜBNER Naturarzneimittel GmbH supplies pure Australian tea tree oil in various bottle sizes:

- Tea tree oil 10 ml PZN 07279979
- Tea tree oil 20 ml PZN 07289469

All Tebamol® products are dermatologically tested and show very good skin compatibility.

May be fatal if swallowed and if ingested. May cause skin, severe eye irritation and allergic skin reactions.

Flammable.

If swallowed, do not induce vomiting, rinse mouth and call poison control center. Seek medical advice immediately and show this container or label.

Keep out of the reach of children.

Undiluted tea tree oil is a powerful substance. Do not use undiluted and only externally.

Keep away from heat.

According to BfR recommendation (Federal Institute for Risk Assessment): Store protected from light in the outer carton and brown glass bottle.

Application possibilities

for the pure essential Tebamol® tea tree oil

For oral hygiene and fresh breath:

Add 1 - 2 drops to ½ glass (approx. 100 ml) of lukewarm water, stir, rinse mouth and spit out.

For impure skin:

Add 2 - 3 drops to a ¼ glass (approx. 50 ml) of water, stir and apply to the appropriate areas of skin with a cotton ball, as required.

For the care of dry skin:

1 - 2 times a week take a care bath (average 140 l) with a mixture of 5 - 10 drops of tea tree oil and 1 - 2 drops of olive oil.

For sports massages:

Stir 3 - 5 drops of tea tree oil into about 100 ml of the massage oil. Then apply to the skin and massage vigorously.

Protects against mosquitoes, ants and other insects:

Insects avoid a room if you put a few drops of Tea Tree Oil in a bowl of warm water or in a fragrance lamp and place it near a window. In addition, a few drops of tea tree oil can be mixed in a massage oil. Apply this mixture to exposed skin areas.

Tebamol® Aktiv-Creme

Special cream for oily and impure skin. The tea tree oil used (Melaleuca aetheroleum), extracted from the leaves and branch tips of the tea tree of the genus Melaleuca alternifolia (of the terpinen-4-ol type), as well as the additional active ingredient complex of ribwort, mahonia and salicylic acid support the care of impure skin. The formation of new skin impurities can be prevented.

- free from synthetic dyes
- free from ethoxylated raw materials
- free from silicones, paraffins and other petroleum products

50 ml PZN 07328761
